

1. PROBLEM STATEMENT

Finding work is quite difficult. It's unclear the path individuals should take in order to select the best employment for their future.

The issues recruiters deal with are

- i) Many users put their fictitious credentials on portals.
- ii) An abundance of applications
- iii) There are too many tests and cheaters.

Issues that job seekers deal with include

- i) A large number of the jobs are fake.
- ii) The listed companies do not specify their actual organisational structure or environment where the business is situated
- iii) A few job platforms also want payment in advance of the start of the job. the work.
- iv) The businesses have not responded.
- v) An old job listing
- vi) Unfit job alerts

2. IDEA/SOLUTION DESCRIPTION
